

PROMPT LOG

Step 15. Maintain evidence of AI usage

Meaningful prompts used during the Prism-to-LaTeX workflow.

No.	Task	Prompt Used	Status
1	File Structure Creation	Create a clean LaTeX article skeleton for a scientific research paper. Include title, authors, abstract, keywords, Introduction, Related Work, Methodology, Experimental Setup, Results and Discussion, Conclusion, and References. Do not generate scientific content. Check the file LiteratureReviewPaper...pdf, copy the exact title, author name, affiliation, write "Department of Information Technology, Indian Institute of Information Technology Allahabad, Uttar Pradesh, India", abstract, keywords. Copy exactly. Do not add, remove, change, modify, fabricate anything. Add "Soumik Bhattacharyya" in author name, remove second author, and add "mde2026005@iitaa.ac.in" to email.	All Accepted
2	Text-to-LaTeX	Check the references section and create a bib file; copy all references correctly and do not fabricate missing information. Copy the Introduction into the main file exactly, preserving paragraph order, citations, terminology, equations and technical details; use standard LaTeX references. Copy Background and Conceptual Foundation, preserving its three subsections and all technical details. Change all section/subsection names to those used in the PDF and maintain order. Copy Thematic Literature Review and its five subsections exactly. Copy Comparison of Existing Approaches and its three subsections; preserve text only and do not copy the table/figures at this point. Copy sections 5 and 5.1, then sections 6 to 9, preserving content and using standard LaTeX references. Do not summarise or fabricate.	All Accepted
3	Equation conversion	NA	NA
4	Table conversion	Convert Table 1 from Section 4 into publication-quality LaTeX. Preserve every row, column heading, unit, decimal value, and result exactly. Do not round, reorder, or reinterpret any value.	Accepted
5	Figure conversion	Add the figures in Sections 4.1 and 8; check the original numbering-order issue and use exact captions. For Figure 2, use a placement option other than [htbp] so it is placed exactly where written.	1. Accepted 2. Rejected
6	Debugging	NA	NA
7	Scientific writing	Improve the clarity, conciseness, grammar, and scientific tone of Section 6. Preserve all technical terminology, citations, numerical values, causal claims, limitations, and scientific meaning. Do not introduce new claims.	Modified
8	Consistency check	Review the manuscript for consistency in terminology, abbreviations, variable names, mathematical notation, dataset/model names, capitalization, units, figure/table references, and citation style. Report inconsistencies only. Do not rewrite the manuscript.	Rejected (No severe issues were found)
